stefan.mills01@utrgv.edu | (956) 935-5763 | stefanmills.github.io/stefan.portfolio | linkedin.com/in/stefan-mills

PROFESSIONAL SUMMARY

Stefan Mills is an Information Systems Ph.D. student (4.0 GPA) and machine learning researcher studying generative AI, trust, and the societal impact of AI-generated content. His work combines deep learning and natural language processing with applied econometrics and causal inference to measure how AI reshapes information, markets, and human decision-making, spanning AI-content detection at scale, trust-calibrated clinical AI, and the economics of AI-generated content. He brings six years of applied data science experience across the United Nations and industry, a peer-reviewed publication, and multiple manuscripts in preparation for leading Information Systems journals.

EDUCATIONAL BACKGROUND

The University of Texas Rio Grande Valley

Ph.D. Student, Business Administration (Information Systems); GPA 4.0/4.0

Edinburg, TX

Aug 2025 – Present

Kwame Nkrumah University of Science and Technology

B.Sc., Computer Science; CWA 66.14/100

Kumasi, Ghana

Jun 2019

HONORS & AWARDS

- **Presidential Research Fellowship (PRF)**, The University of Texas Rio Grande Valley — \$2,000. 2025.

RESEARCH

Research Areas

- Deep Learning and Natural Language Processing
- Generative AI and Society
- AI Model Autophagy
- Shadow AI
- AI in Healthcare
- Applied Econometrics and Causal Inference

Conference Proceedings (Accepted)

- Mills, S., Wang, X., and Owusu, G. (2026). "Reducing Routine Friction: The Impact of Course-Specific Generative AI on Student Information Seeking." Emergent Research Forum (ERF), Americas Conference on Information Systems (AMCIS), Reno, NV.

Manuscripts in Preparation

- Mills, S., and Wang, B. "Synthetic Noise: How AI-Generated Content Affects the Information Value of Financial Reddit Communities." In preparation for submission to a Senior Scholars' Basket journal (ISR/JMIS).
- Mills, S., and Wang, X. "Trust Calibration in Human-AI Clinical Decision-Making: A Bayesian Multi-Agent Simulation." In preparation for submission to Information Systems Research (ISR).
- Mills, S., and Qin, H. "From Transparency to Integrity: How GenAI Transparency Shapes Student Trust Calibration and Ethical Use." In preparation for submission to the Journal of the Association for Information Systems (JAIS).
- Sangboon, K., Mills, S., Aryee, A., and Rizwan, M. "Compensation Discussion and Analysis (CD&A) Obfuscation and Market Reactions under SEC Item 402(x)." In preparation.

TECHNICAL SKILLS

- **Data Warehousing & Engineering:** ETL pipeline design, data modeling, MS-SQL, MySQL, MS Access, Open Data Kit (ODK)
- **Data Mining & Machine Learning:** classification (decision trees, logistic regression, Naïve Bayes, KNN), clustering (K-means, hierarchical), association rules (Apriori), text mining, model evaluation (confusion matrix, precision/recall)
- **Deep Learning & NLP:** transformer models (BERT, RoBERTa, FinBERT), fine-tuning, uncertainty estimation
- **Programming:** Python, R, SQL
- **BI & Visualization:** Tableau, Power BI
- **Cloud & Statistical Tools:** AWS, Microsoft Azure, SPSS, Git

STEFAN AMEYAW MILLS

PROFESSIONAL EXPERIENCE

The University of Texas Rio Grande Valley

Edinburg, TX

Graduate Research Assistant

Sep 2025 – Present

- Research generative AI, trust, and the detection of AI-generated content; build deep learning and NLP models using transformers (BERT, RoBERTa, FinBERT) to detect AI-generated text and assess online content integrity.
- Built large-scale data pipelines processing millions of social media records and generated synthetic AI text with large language models to train and evaluate detection models.
- Applied econometric and causal-inference methods (difference-in-differences) and agent-based simulation to study human trust and reliance on AI.
- Prepared and co-authored multiple research manuscripts for submission to leading Information Systems journals and conferences, contributing literature review, data analysis, and writing.

United Nations World Food Programme

Accra, Ghana

Data Scientist

Apr 2024 – Aug 2025

- Architected and implemented ETL data pipelines automating extraction, transformation, and loading, reducing manual workload by 60% and improving data reliability.
- Built forensic and predictive models in Python that identified fraudulent activity and prevented over US\$1M in donor losses.
- Conducted data cleaning and exploratory analysis (Python, SQL); built interactive Tableau and Power BI dashboards to support stakeholder decision-making.
- Developed ODK survey tools integrated with APIs for real-time data synchronization and improved data quality.

Huawei Technologies

Accra, Ghana

Product Manager

Jan 2023 – Nov 2023

- Designed and implemented energy-optimization solutions (rectifier cabinets, solar) that opened a new market segment, driving \$74K in revenue; forged vendor partnerships expanding offerings 25% and unlocking \$800K in new business.
- Analyzed large-scale 2G/3G/4G network KPI datasets and built machine learning models to detect anomalies and predict failures, improving operational efficiency and profitability by over 40%.

Huawei Technologies

Accra, Ghana

Associate Product Manager

Dec 2021 – Jan 2023

- Led a cross-functional team to deliver innovative network solutions, achieving a 30% market-share increase within six months.
- Performed integrated network and market analytics, correlating RAN performance with competitor and pricing trends to guide positioning, resulting in a 10% market-share gain.

Huawei Technologies

Accra, Ghana

Wireless Engineer & Technical Team Lead

Sep 2019 – Dec 2021

- Managed and optimized RAN infrastructure for Vodafone Ghana, improving network reliability 30% and reducing downtime by 95% across multiple sites.
- Configured, integrated, and tested 4G/3G RAN network elements across 800+ sites; mentored junior engineers, improving team proficiency by 60%.

PROFESSIONAL ASSOCIATIONS & SERVICE

- Member, Association for Information Systems (AIS), 2025 – Present.

SELECTED VOLUNTEERING

STEFAN AMEYAW MILLS

stefan.mills01@utrgv.edu | (956) 935-5763 | stefanmills.github.io/stefan.portfolio | linkedin.com/in/stefan-mills

- **Data Analyst Volunteer, Postszn** (Remote, USA): Python web scraping and analytics on NFL highlight data, driving a 25% boost in viewer engagement, 2022.
- **Youth Mentor & STEM Instructor:** KNUST Chess Club and Knights & Ladies of the Altar, Ghana.
